

# Google Colab Setup

## Download files

### 1. Go to Skillsoft SharePoint Site (or Github) to access files

<https://skillsoft.sharepoint.com/sites/LiveBootcamp/Shared%20Documents/Forms/AllItems.aspx?id=%2Fsites%2FLiveBootcamp%2FShared%20Documents%2FData%20Visualization%20with%20Python>

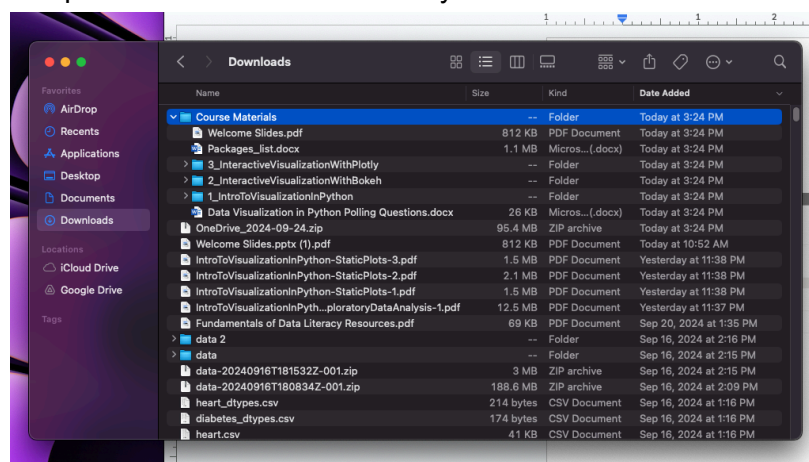

The screenshot shows the Skillsoft SharePoint interface. At the top, there's a header with the Skillsoft logo and 'Microsoft 365'. Below that, a red 'LB' icon and 'Live Bootcamp' are visible. A navigation bar includes 'Download', 'Copy to', and 'Request files'. The main content area is titled 'Documents > Data Visualization with Python'. It displays a table of documents with columns for Name, Modified, Modified By, File Size, and Content Type.

Name	Modified	Modified By	File Size	Content Type
Course Materials	March 15	Erin Ring	6 items	Folder
QA	September 22, 2023	Carl Mullin	1 item	Folder
Recordings	6 hours ago	Dave Robichaud	1 item	Folder
Data Visualization with Python Bootcamp...	March 15	Erin Ring	450 KB	Document
DataVizPercipioResources.pdf	February 6	Chris Keenan	1.04 MB	Document

### 2. Download Course Materials

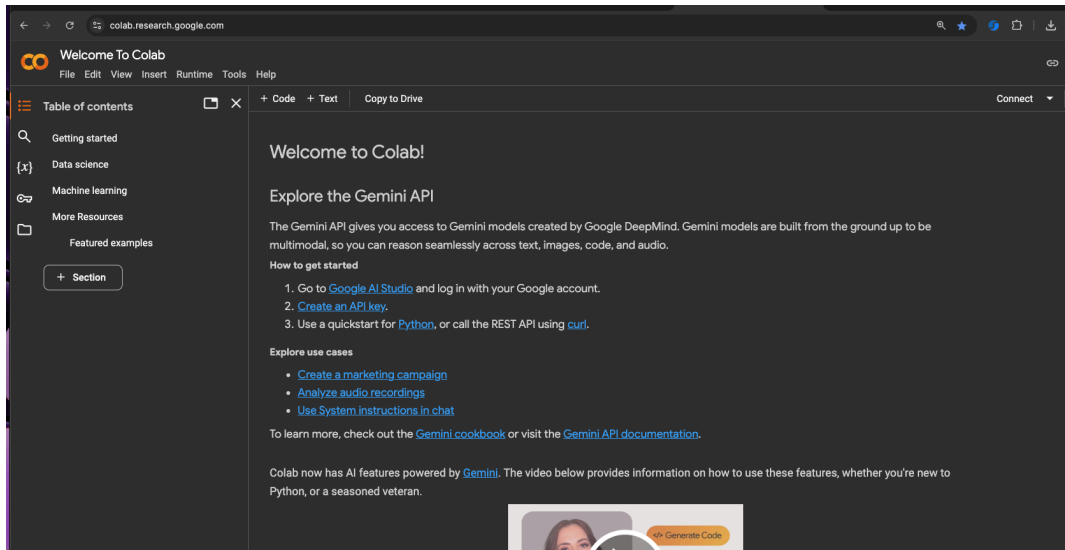

Unzip file if it doesn't automatically do this on download.

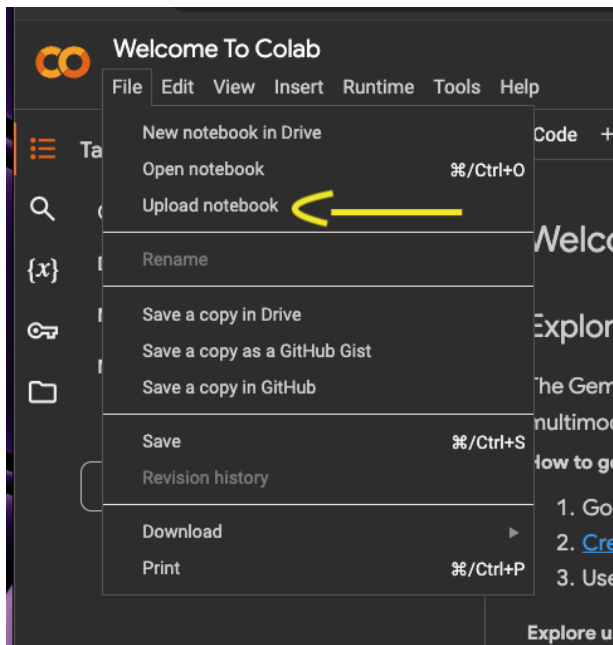

Move files if you like.

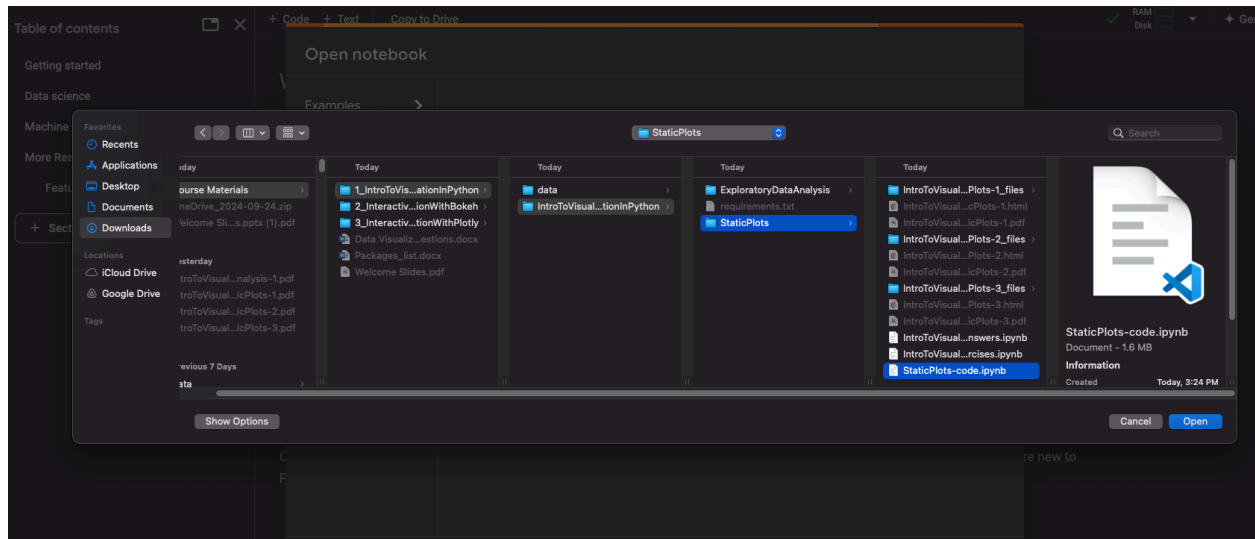

# Go to Google Colab

<https://colab.research.google.com/>

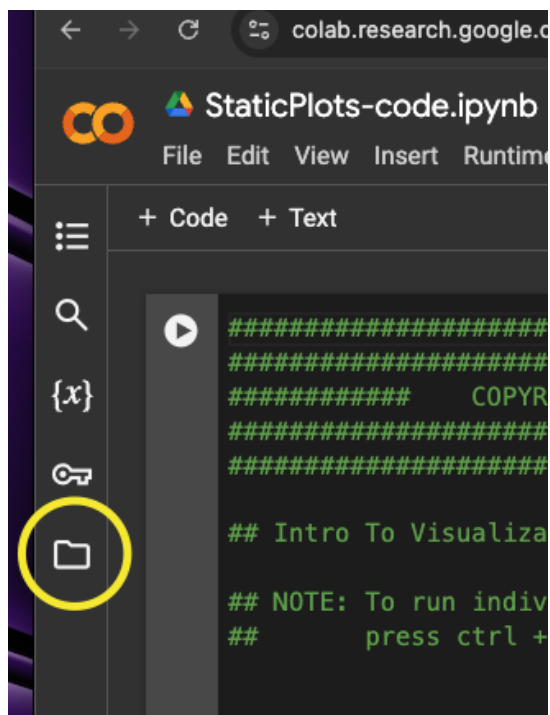

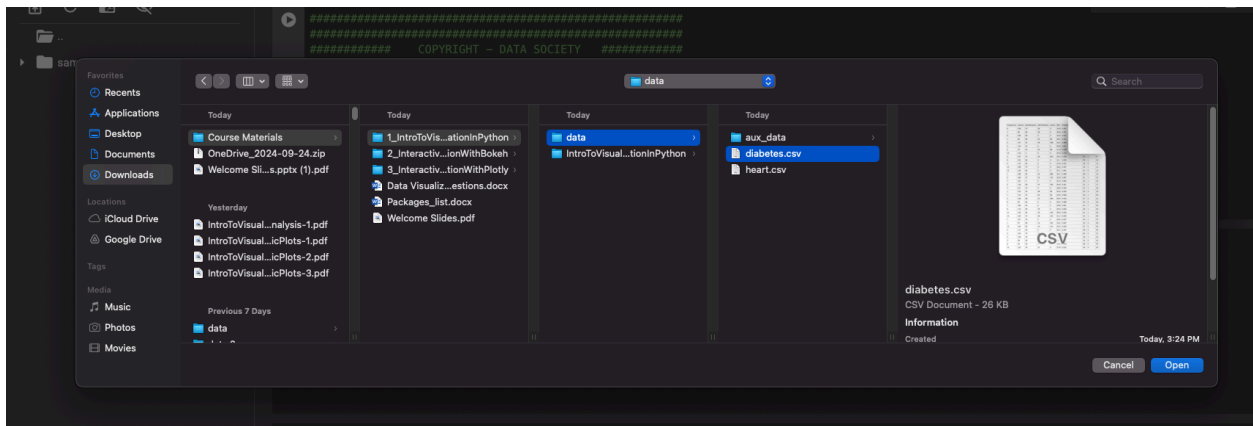

## 1. Upload Code notebook

## 2. Upload Dataset

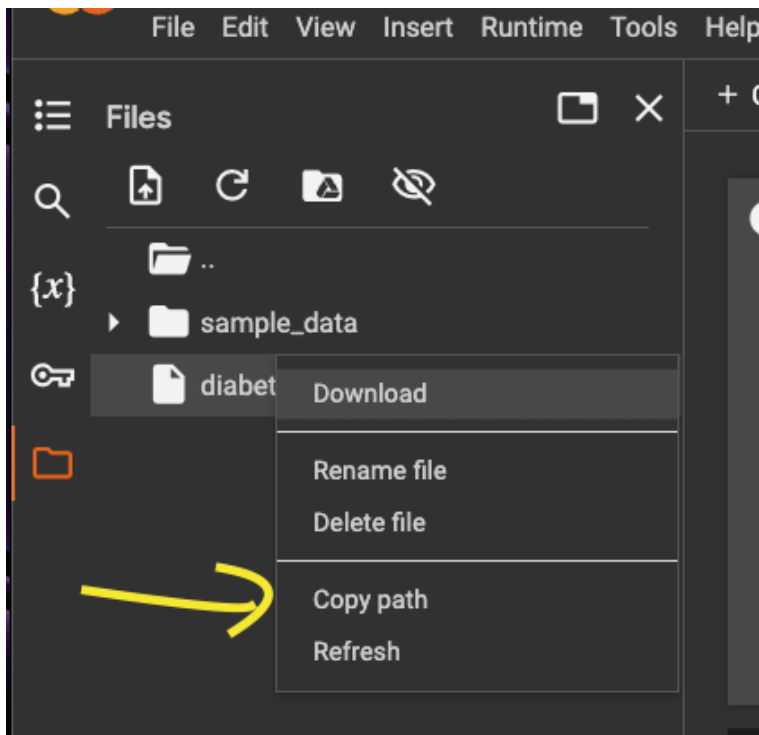

### 3. Load dataset into notebook

#### A. Find dataset file path

#### B. Copy file path

/content/diabetes.csv

### C. Paste file path into the df variable

In between the quotes inside the pd.read\_csv function

```
[ ] #=====
    #### Slide 6/32: Dataset for visualization  ####

    # This dataset is of type dataframe. Let's assign this dataset to a variable, so that we can manipulate it freely.
    df = pd.read_csv("/content/diabetes.csv")
    print(type(df)) #<- a Pandas DataFrame!
    print(len(df)) #<- returns the number of rows

<class 'pandas.core.frame.DataFrame'>
768

[ ] #=====
```

```
df = pd.read_csv("/content//diabetes.csv")
```

### D. Comment out existing directory information (We don't need these in Colab)

```
#=====
#### Slide 4/32: Directory settings  ####

# Set 'main_dir' to location of the project folder
#home_dir = Path(".").resolve()
#main_dir = home_dir.parent.parent
#print(main_dir)
#data_dir = str(main_dir) + "/data"
#print(data_dir)
#plot_dir = str(main_dir) + "/plots"
#if not os.path.exists(plot_dir):
#    # os.makedirs(plot_dir)
#print(plot_dir)
```
